INDEX

Volume 25, 1946[1]

ACID: caries, 168*
Acrylic resins: polymerization, 160*
Age distribution: dental defects, 107
Agglutination: treponemata and borrelia, 163*
Agranulocytosis: supporting tissues, 501
Alginate impression materials, 160*
Alloys. See amalgam, gold, base and precious metals, silver.
Altitude: pulp chambers, 299
Alveolar bone destruction, 173*
Alveolar pathology: sheep and goats, 513
Amalgam alloy: heat treating, 159*
Amelectomy, 182*
Ameloblasts: life span, 145
Anesthesia: refrigeration, 433
Arginase-arginine: metabolism, 180*
——: regeneration; repair; neoplasms, 497
Arginase: guanidine; thryoxin; tissue culture, 180*
ARMSTRONG, W. D.: bone growth; paralyzed limbs, 157*
——: estrogenic hormone; teeth, 173*
——: remarks of retiring president. (Title only), 173*
ASLING, C. W.: hypophysectomized rats; growth hormone and thyroxin, 174*

BACTERIA: caries; dentin, 164*
——: ——; hamster, 455
——: ——; plaque, 195
——: glycerite of hydrogen peroxide, 223
——: oral; pH, 172*
——: plaque; caries, 195
Bactèria: putrefactive, 73
——: salivary; streptothrycin, 181*
——. See also under specific names and organisms.
BAHLKE, A.: polio virus; entry; pulp, 172*
BARNFIELD, W. F.: alveolar bone destruction; rat, 173*
——: gingivae; pathologic calcification, 173*
BASS, C. C.: epithelial attachment; demonstrable line, 401
BAUER, W. H.: agranulocytosis; supporting tissues, 501
BECKS, H.: calcium-phosphorus; saliva, 267, 275, 285
——: hypophysectomized rats; growth hormone and thyroxin, 174*
——: ——; incisor changes, 174*
——: mandibular joint; growth, 177*
——: ——; growth hormone and thyroxin; hypophysectomy, 175*
BERG, M.: putrefactive organisms; mouth, 73
——: salivary proteins; putrefaction rate, 170*, 171*, 231
BERNIER, J. L.: myoblastoma, 253
BEVELANDER, G.: odontoblasts; dentinogenesis, 381
BIBBY, B. G.: enamel solubility; effect of various agents, 161*
——: sodium fluoride; prophylactic mixture; mouthwash, 176*, 207
——: streptothrycin; oral therapy, 181*
——: ——; salivary bacteria, 181*
BLAYNEY, J. R.: dental plaque; bacteria; caries, 195
——: fluoride; bone meal powder; defluorinated phosphate; sodium fluoride, 311
Blood: studies; periodontoclasia, 180*, 247
BODECKER, C. F.: amelectomy, 182*
——: sheath of Neumann, 176*
——: vital staining; dentin; enamel, 176*, 387
BOELSCHE, R.: caries; pigmentation; acid, 168*
Bone: growth in paralyzed limbs, 157*
Borrelia: agglutination, 163*

[1] Abbreviations used: I. A. D. R.—International Association for Dental Research; J. D. R.—Journal of Dental Research.
* Abstract.

Boyd, J. D.: caries; effect of dental care; 162*
——: fluorosis; caries inconstancy, 162*
Boyle, P. E.: electron microscope; enamel observation, 156*
Bradel, S. F.: dental plaque; bacteria; caries, 195
Brodie, A. G.: head; growth, 168*
Brown, E. A.: glycerite of hydrogen peroxide; bacteria, 223
Buchbinder, M.: penicillin; root canal therapy, 13
Buffer capacity; saliva; caries, 213
Burrill, D. Y.: salivary proteins; putrefaction rate, 170*, 171*, 231

CADMIUM: caries, 167*, 337
Calcification: gingivae, 173*
——: saliva, 267, 275, 285
Carbohydrate: fermentation; saliva, 172*
Carboxyl-CO_2: saliva, 491
Caries: bacteria, 455, 164*, 195
——: deciduous teeth; Formosa Chinese, 127
——: dentin; bacteriology, 164*
——: effect of dental care, 162*
——: enamel, 166*
——: fluorapatite, 182*
——: fluoride, 469
——: ——; dentifrice, 121
——: —— ——, 183*
——: ——; prophylactic mixture; mouthwash, 176*, 207
——: hamster, 165*, 166*, 341, 491
——: hypercalcified dentin, 164*
——: Masai; 17
——: penicillin, 441
——: pigmentation; acid, 168*
——: plaque; bacteria, 195
——: saliva; buffer capacity, 213
——: "Septochem" application, 17
——: urea, 469
——. See also dental defects.
Carpousis, A.: fluorapatite; caries, 182*
Casting: base metals and gold, 158*
——: density, 184*
——: shrinkage; gold, 159*
Chase, S. W.: periodontal vessels; orthodontic tooth movement, 170*
——: Presidential address; I. A. D. R.; dental research in the near future, 151
Cheyne, V. D.: caries; effect of dental care, 162*
——: fluorosis; caries inconstancy, 162*
Children: caries; dental care, 162*
Citrate ion vs. lactate: rat molar, 1, 183*
Cline, J. K.: saliva; buffer capacity; caries, 213
Collins, D. A.: hypophysectomized rats; incisor changes, 174*
——: mandibular joint; growth, 177*
——: —— ——; growth hormone and thyroxin; hypophysectomy, 175*
Collins, P.: base metal; casting, 158*
Crawford, H. M.: hypercalcified barriers; dentin, 165*
Cook, T. J.: penicillin; therapy, 178*

DAHLBERG, B.: masticatory habits, 67
Dam, H.: vitamin E deficiency; teeth, 179*
Davidson, N. R.: electron microscope; enamel observation, 156*
Dean, H. T.: experience and observations in war zones. II. Europe (title only.), 173*
Deciduous teeth: eruption; age; order, 43
——: Formosa Chinese; caries, 127
——: root canal; morphology, 169*
Decompression chamber: pulp chamber, 299
Dens in dente, 185*
Dental defects: age and regional distribution, 107
Dentifrice: fluorapatite, 182*
——: fluoride; caries, 121
Dentin: formative cells; life span, 145
——: hypercalcified barrier, 165*
——: hypercalcified caries, 164*
——: secondary, 29, 169*
——: sheath of Neumann, 176*
——: sodium iodide deposition, 95
——: vital staining, 176*, 387
Dentinogenesis, 381
Diabetes: periodontium; pancreas; blood sugar, 169*
Dochterman, E. F.: dental defects; age in regional distribution; Naval personnel, 107
Dreizen, S.: saliva; buffer capacity; caries, 213
Dummett, C. O.: physiological pigmentation; Negro, 155*, 421

EDITOR'S Viewpoint, 16, 82, 105, 193, 297, 419

* Abstract.

EISENBRANDT, L. L.: sulfathiazole gum; therapy, 178*
Electron microscope: enamel observation, 156*
——: studies, 185*
Enamel: bands of Shreger, 373
——: caries, 166*
——: electron microscope observations, 156*
——: formative cells; life span, 145
——: sodium iodide deposition, 95
——: solubility; effect of various agents, 161*
——: undecalcified; serial sections, 355
——: vital staining, 176*, 387
Eosinophilic granuloma, 186*, 261
Epithelial attachment: demonstrable line, 401
Erosion: rat molar, 1, 183*
Eruption: deciduous dentition, 43
EVANS, H.: hypophysectomized rats; growth hormone and thyroxin, 174*
——: mandibular joint; growth, 177*
——: —— ——; growth hormone and thyroxin; hypophysectomy, 175*
Extraction: nerve degeneration, 168*

FALKENHEIM, M.: fluoride adsorption; radioactive phosphorus, 161*
Fibro-osteoma, 417*
FINN, S. B.: polio virus; entry; pulp, 172*
Fluorapatite: caries, 182*
Fluoride: adsorption; radioactive phosphorus, 161*
——: bone meal powder; defluorinated phosphate; sodium fluoride, 311
——: caries, 121, 162*, 176*, 183*, 207, 469
——: dentifrice; caries, 121, 183*
——: prophylactic mixture; mouthwash; caries, 176*, 207
——: teeth and blood, 327
——: toxicity, 183*
Formosa Chinese: caries; deciduous teeth, 127
FOSDICK, L. S.: salivary proteins; putrefaction rate, 170*, 171*, 231
——: putrefactive organisms; mouth, 73
FOSTER, W.: caries; fluoride dentifrice, 183*
——: fluorine; toxicity, 183*
FRISBIE, H. E.: caries; enamel, 166*

GAINSFORTH, B. L.: orthodontics; sculpture, 186*
Geographic distribution. See regional distribution.
GIES, W. J.: endowment fund; J. D. R., 521
GILDA, J. E.: Manly-Hodge separation method; rat and hamster, 161*
Gingivae; pathologic calcification, 173*
Gingival pigmentation: elimination, 179*
Gingivitis: Masai, 17
GLICKMAN, I.: diabetes; periodontium; pancreas; blood; sugar, 169*
Glycerite of hydrogen peroxide: bacteria, 223
Goats: alveolar pathology, 513
Gold: casting; investment, 158*, 160*
——: ——; shrinkage, 159*
GOTTLIEB, B.: caries; pigmentation; acid, 168*
——: hereditary opalescent dentin, 178*
——: hypercalcified barriers; dentin, 165*
——: hypercalcified dentin; caries, 164*
——: odontoblasts; purpose, 25, 178*
——: secondary dentin; internal and external resorption, 29, 169*
GRANDOS, H.: vitamin E deficiency; teeth, 179*
GREENWOOD, D. A.: fluoride; bone meal powder; defluorinated phosphate; sodium fluoride, 311
Growth: bone; paralyzed limbs, 157*
——: dentin, 381
——: head, 168*
——: mandible, 158*
——: mandibular joint, 177*
——: tissue culture, 180*
Growth hormone: mandibular joint, 175*
——: response; tibia, 174*
Guanidine: thyroxin; tissue culture, 180*
GURNEY, B. F.: tooth surface; minute changes, 367

HAMPP, E. G.: agglutination; treponemata and borrelia, 163*
Hamster: character and distribution of caries, 165*, 341, 445
——: molars and lesions, 445
——: plaque; periodontal disease; caries, 166*
HARMON, I. M.: acrylic resins, polymerization, 160*
HARRISON, R. W.: dental plaque; bacteria; caries, 195
HATTON, E. H.: list of members; I. A. D. R., 540

* Abstract.

Head: growth, 168*
Heat treating: amalgam alloy, 159*
HEMMENS, E. S.: dental plaque; bacteria; caries, 195
——: pH; oral organisms, 172*
Hereditary opalescent dentin, 178*
HEWITT, W. L.: penicillin; caries; L. acidophilus, 441
HILLIER, J.: electron microscope; enamel observation, 156*
HINE, M. K.: sodium hexametaphosphate; effect, 184*
HIRSCHFELD, I.: gingival pigmentation; elimination, 179*
——, L.: —— ——; ——, 179*
HODGE, H. C.: fluoride adsorption; radioactive phosphorus, 161*
HODGES, P. C.: ——; bone meal powder; defluorinated phosphate; sodium fluoride, 311
HOLLENBACK, G. M.: casting shrinkage; gold, 159*
Hormone: estrogenic hormone; teeth, 173*
——: mandibular condyle change, 157*, 509
HURME, V. O.: deciduous teeth; Formosa Chinese; caries, 127
Hydrogen peroxide; glycerite; bacteria, 223
Hypophysectomy: incisor changes, 174*
——: mandibular joint; growth, 177*
——: —— ——, 175*
——: tibial response, 174*

I. A. D. R.: list of members; membership list, 540
——: proceedings; address; presidential, 151
——: ——; contents, 151
——: ——; executive, 187
——: ——; index of participents, 155
——: ——; members; new, 189
——: ——; New York section; June 5, 1946, 417
——: ——; officers, 189
——: ——; reports; committees and officers, 187
——: ——; 25th anniversary celebration, 293
Impression: aliginate, 160*
Investment: castings, 158*, 160*
IRELAND, R. L.: pulp canal morphology; deciduous molars, 169*
IRONS, W. G.: arginase - arginine metabolism, 180*
——: ——; regeneration; repair; neoplasms, 497
——: arginine; guanidine; thyroxin; tissue culture, 180*
IRVING, J. T.: sodium fluoride; teeth; blood, 327

JANSEN, M. T.: serial sections; undecalcified enamel, 355
J. D. R.: Gies endowment fund, 521
JOHNSON, F. G.: L. acidophilus; nutritional requirements, 35
JOHNSON, P. L.: odontoblasts; dentinogenesis, 381

KARLAN, F. R.: blood studies; periodontoclasia, 180*, 247
KARSHAN, M.: blood studies; periodontoclasis, 180*, 247
KEYES, P. H.: character and distribution of caries; hamster, 165*, 341
——: plaque; periodontal disease; caries; hamster, 166*
——: sodium fluoride; urea; caries; hamster, 469
KITCHIN, P. C.: L. acidophilus; salivary counts, variation, 167*, 475
KORNS, R.: polio virus; entry; pulp, 172*
KRASNOW, F.: I. A. D. R.; proceedings; 25th anniversary celebration, 293

LABUNSKY, B.: sodium fluoride; prophylactic mixture, mouthwash, 176*, 207
L. acidophilus: hydrolyzed saliva nutrients, 137
——: nutritional requirements, 35
——: penicillin, 441
——: salivary count; variation, 167*, 475
——: salivary growth factors, 83
——: tryptophane replacement, 487
Lactate ion vs. citrate; rat molar, 1, 183*
LAWYER, A.: streptothrycin; oral therapy, 181*
——: ——; salivary bacteria, 181*
LAZANSKY, J. P.: "Septochem"; experimental caries, 21
LEFKOWITZ, W.: amelectomy, 182*
——: vital staining, dentin, enamel, 176*, 387
LEICESTER, H. M.: cadmium; caries, 167*, 337

* Abstract.

LEONARD, H. J.: blood studies; periodontoclasia, 180*; 247
LEUNG, S. W.: electron microscopic, 185*
——: oxygen content of air; salivary volume of pH, 170*
LIKENS, R. C.; plaque; periodontal disease; caries, 166*

MC CLENDON, J. F.: caries; fluoride dentifrice, 183*
——: fluorapatite; caries, 182*
——: fluorine; toxicity, 183*
McCLURE, F. J.: citrate vs. lactate ions; rat molar destruction, 1, 183*
——: penicillin; caries; L. acidophilus, 441
McKINNON, I.: enamel solubility; effect of various agents, 161*
McKELLEGET, M.: sodium fluoride; prophylactic mixture; mouthwash, 176*, 207
MANDEL, I. D.: sodium iodide; deposition in calcified dental tissue, 95
MANDIBLE: condyle; hormonal and nutritional change, 157*, 509
——: growth, 158*
——: joint; growth, 177*
——: ——; growth hormone and thyroxin; hypophysectomy, 175*
MANN, A. W.: saliva; buffer capacity; caries, 213
Maruyama: analytical summary, 127
Massai: teeth, 17
MASON, K. E.: vitamin E deficiency; teeth, 179*
MASSLER, M.: appositional life span; dentin in enamel forming cells, 145
Mastication: habits, 67
Mercury-alloy: ratio, 183*
MEREDITH, H. V.: deciduous dentition; eruption; age; order, 43
Metal: base; casting, 158*
——: precious, 159*
——: salts; effect on enamel solubility, 161*
Metallurgy: precious metal alloys, 159*
Methacrylate resin: dimensional change, 160*
Methyl methacrylate: embedding specimens, 157*
MILLER, S. C.: I. A. D. R.; proceedings; New York Section, June 5, 1946, 417
MOORE, A. W.: embedding anatomical specimens; methyl methacrylate, 157*
MOORE, T. E.: investment; casting, 158*
Mottled enamel. See fluoride.
Myoblastoma, 253

NEGRO: pigmentation, 155*, 421

NEINABER, M. W. P.: sodium fluoride; teeth; blood, 327
NELSON, M. M.: pantothenic acid deficiency; tibia, 185*
Neoplasm: arginine-arginase, 497
——: fibro-osteoma, 417*
——: myoblastoma, 253
Nerve: degeneration; tooth removal, 168*
NUCKOLLS, J.: caries; dentin; bacteriology, 164*
Nutrition: L. acidophilus, 35
——: ——, hydrolyzed saliva, 137
——: ——, salivary source, 83
——: mandibular condyle change, 157*, 509

ODONTOBLAST: dentinogenesis, 381
——: purpose, 25, 178*
ORBAN, B.: oxygen; atomic vs. molecular, 169*
——: pulp changes; decompression chamber, 299
ORLAND, F. J.: bacteria; caries; hamster, 445
——: hamster; molars and lesions, 455
Orthodontic tooth movement: periodontal vessels, 170*
Orthodontics: plane angle, 418*
——: sculpture, 186*
Ortho-phenyl-phenol: root canal therapy, 185*
ORTIZ, M.: head; growth, 168*
Oxygen: air; saliva, 170*
——: atomic vs. molecular, 169*

PAIN: threshold variability, 101
Panthothenic acid: deficiency; tibia, 186*
PARKE, G. L.: sterilization; hot oil bath, 89
Penicillin: caries; L. acidophilus, 441
——: root canal therapy, 13
——: therapy, 178*
Periodontal disease, 166*
—— ——: putrefaction of salivary proteins, 170*, 171*, 231
—— ——: putrefactive organisms, 73
—— ——: rat, 173*

* Abstract.

Periodontal vessels: orthodontic tooth movement, 170*
Periodontium: diabetes, 169*
Periodontoclasia: blood studies, 180*, 247
PERMAR, D.: L. acidophilus; salivary counts, variation, 167*, 475
pH: oral bacteria, 172*
——: saliva; oxygen content of air, 170*
PHILLIPS, R. W.: casting; density; ring position, 184*
——: mercury-alloy; ratio, 183*
——: sodium hexametaphosphate, effect, 184*
Phosphorus: calcium; saliva, 267, 275, 285
Pigmentation: caries, 168*
——: gingivae, 179*
——: Negro, 155*, 421
PINKERTON, D.: carbohydrate fermentation; saliva, 172*
Plaque: bacteria; caries, 195
——: hamster, 166*
Polio virus: entry; pulp, 172*
POMES, C. E.: alginate impression materials, 161*
Proteins: saliva; putrefaction rate, 170*, 171*, 231
Pulp canal: morphology, deciduous molars, 169*
——: decompression chamber, 299
——: polio virus, 172*
——. See also root canal.

RABKIN, S.: alveolar pathology; sheep and goats, 513
RANKOW, R. M.: fibro-osteoma; monkey, 417*
RAPP, G. W.: tooth surface; minute changes, 367
RAY, K. W.: amalgam alloy; heat treating, 159*
Refrigeration: anesthesia, 433
Regeneration: arginine-arginase, 497
Regional distribution: dental defects, 107
Repair: arginine-arginase, 497
Research: dental, 151
Resins. See specific resins as acrylic.
Resorption: external and internal, 29
RESTARSKI, J. S.: anesthesia; local refrigeration, 433
——: dental defects; age in regional distribution; Naval personnel, 107
REVESZ, J.: periodontal vessels; orthodontic tooth movement, 170*
Rickets: mandibular condyle; change, 509
RITCHEY, B.: pulp changes; decompression chamber, 299
ROBINSON, H. B. G.: editor's viewpoint, 16, 82, 105, 193, 297, 419
——: I. A. D. R.; proceedings, 151
——: L. acidophilus; salivary counts; variation, 167*, 475
Root canal therapy: penicillin, 13
——: ortho-phenyl-phenol, 185*
